FBR Set & SecureCap

For safe and efficient removal of foreign objects

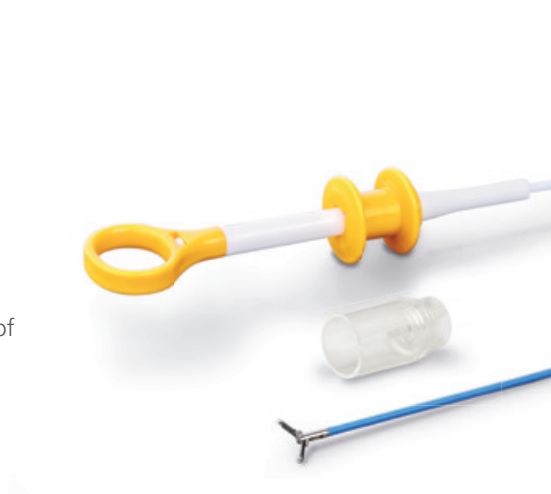

- Alligator and rat teeth in a grasper
- Long and elastic retrieval cap
- Safe retrieval of sharp objects

FBR Set & SecureCap

The FBR Set is a foreign body removal set for the safe retrieval of various foreign objects.

The SecureCap is an elastic and transparent retrieval cap. It enables the safe extraction of foreign bodies in the gastrointestinal tract.
The remOVE Grasper is a grasping forceps for grasping and retrieving foreign bodies in the gastrointestinal tract. It has alligator and rat teeth on the branches for a strong hold and easy withdrawal of the foreign body into the SecureCap.
