Baseline colonoscopy

(fulfilling all of: caecal intubation, adequate bowel prep and clearance of all premalignant polyps
(consider site-check for 10-19mm NPCP’s without histological confirmation or complete excision)

Non pedunculated colorectal polyp ≥20mm

R0 en bloc resection?

no

yes

≥2 adenomas or serrated polyps (≥10mm) including ≥1 with advanced features (adenoma with HGD, serrated polyp with dysplasia) or ≥5 adenomas or serrated polyps (<10mm)

= High-risk findings

One-off surveillance colonoscopy 3 years later #

No colonoscopic surveillance *

# no surveillance if life-expectancy <10y or if older than about 75y)
* If patient is >10y younger than lower screening age and has polyps but no high-risk findings, consider colonoscopy at 5 or 10y)
